

Game Instructions

LogiTower

Art.-No. 3386

Content : 1 base plate with wooden sticks of different lengths and
8 punched discs

This game stimulates the motivity resp. the eye-hand coordination, as well as the logical and combinational reasoning.

In the beginning all wooden discs with the coloured side showing down will be placed on the table and thoroughly shuffled. Afterwards, the player arranges the base plate with the coloured sticks in front of him.

Now, take a punched disc out from the pile in the middle of the table and try to stack it on the sticks in such a way that it lies horizontally.

In case one disc does not fit, return it and choose another one. This will be done until little by little less and less sticks protrude from the pile of discs.

Notice :

The coloured rings on the punched discs are meant as an aid to orientation for the younger players only.

More than one player will rotate resp. play clockwise.

Enjoy your game and good luck !
